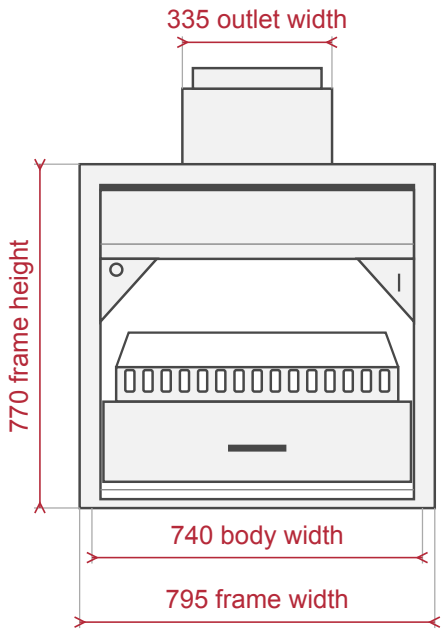
ALL SIZES IN MILLIMETRES

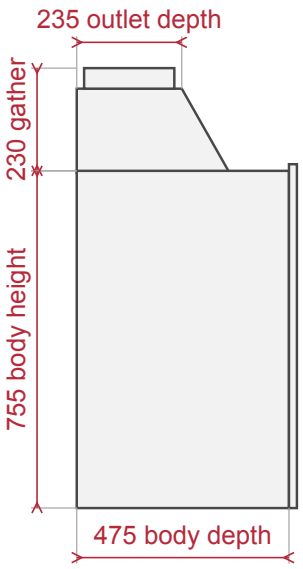
Homefires 700D Built-in Fireplace

Built-in open fireplace, single sided and deep, with natural convection: wood and anthracite

01 FRONT VIEW

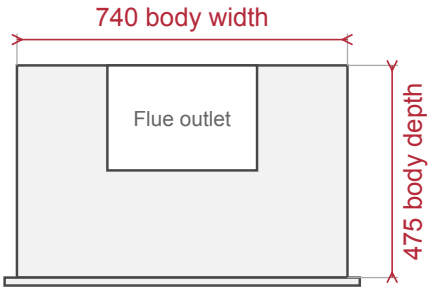


02 SIDE VIEW



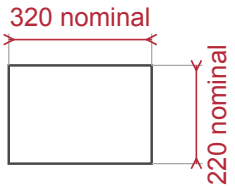
Front at the right.

03 TOP VIEW



Back at the top. Front at the bottom.

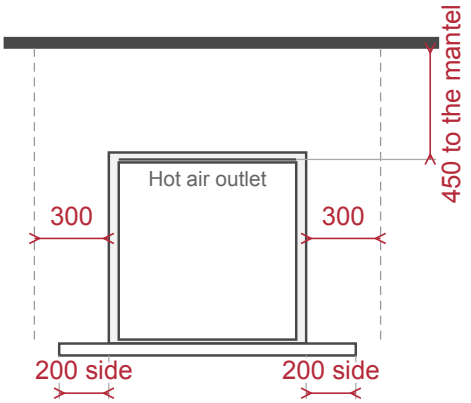
04 FLUE PIPE



The flue pipe size, not the size of the outlet.

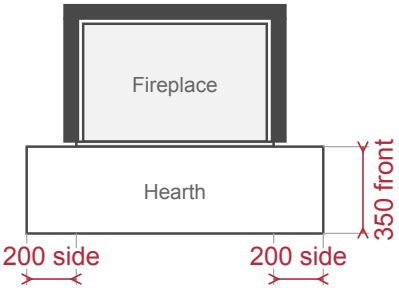
Homefires 700D Built-in Fireplace

05 CLEARANCES (SMALLER SCALE)

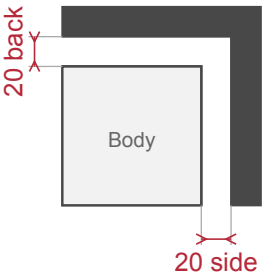


Front view, built in. Dark: a mantel or shelf. Dashed: other heat-sensitive material. 450 runs from the hot air outlet. 300 runs from each front edge of the frame.

06 HEARTH AND GAPS (SMALLER SCALE)



Plan. Front at the bottom.
Dark: brickwork.



Back corner, larger scale.

PLANNING NOTES

These are product sizes, not a building-opening size. Ask us for the opening size before you build.
The frame is wider and higher than the body. The gather rises above the body.
Leave a gap of 20 between the body and the brickwork, at the sides and at the back, for the steel to expand.
Keep the bottom cold-air inlet open after installation.
Included: the fire grate and grid, the ash drawer, the built-in damper, the insulation material and touch-up paint.
Medium cowl tops with 220 × 320 bases and medium fixed cowls are separate options.
Heating volume: 120 m³.
