ALL SIZES IN MILLIMETRES

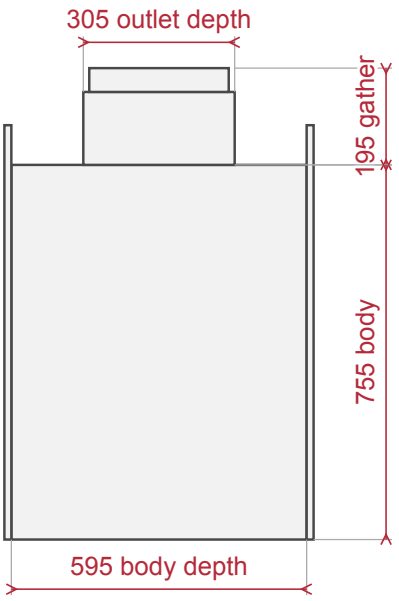

Homefires 1000 Double Sided Built-in Fireplace

Built-in fireplace: a fire face on both sides, four glass doors, for wood or anthracite

01 FRONT VIEW, BOTH FACES

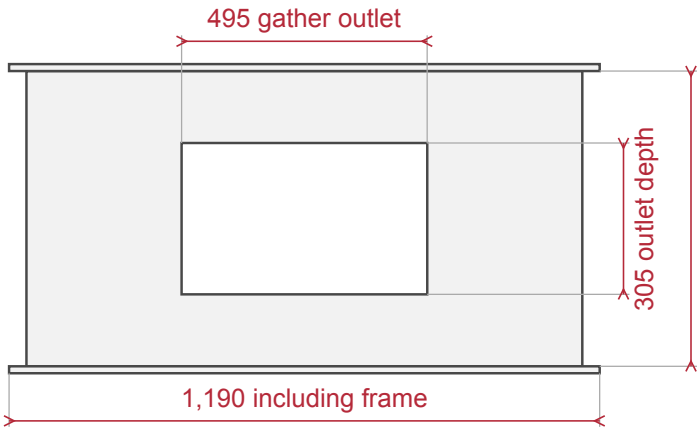

02 SIDE VIEW

A fire face at the left and at the right.

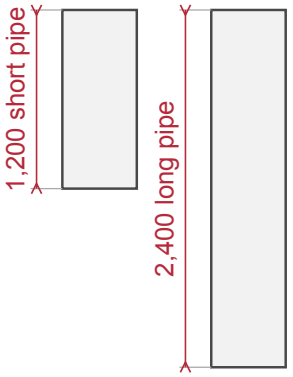

03 TOP VIEW

A fire face at the top and at the bottom. White: the gather outlet.

04 FLUE PIPES, SOLD SEPARATELY (SMALLER SCALE)

The 300 x 500 flue pipes, joining collars, a large slip-on cowl base and a large cowl top are options. Choose them on this page.

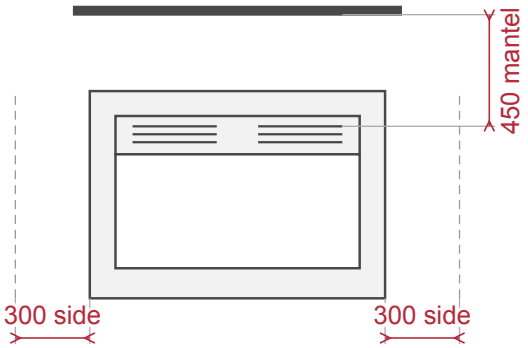

BRAAI CULTURE

ALL SIZES IN MILLIMETRES

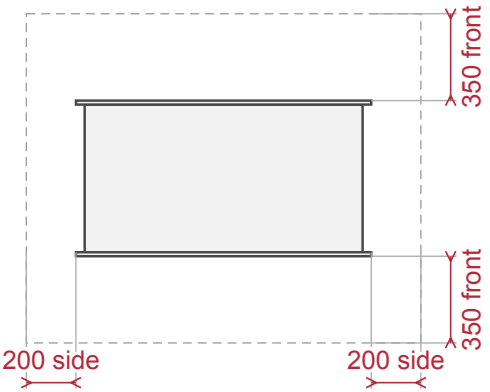

Homefires 1000 Double Sided Built-in Fireplace

05 CLEARANCES FROM THE FRONT (SMALLER SCALE)

Keep a shelf or mantel at least 450 above the hot-air outlet. Keep heat-sensitive materials at the sides 300 away.

06 HEARTH FROM ABOVE (SMALLER SCALE)

Dashed: the edge of the hearth.
The hearth extends at each fire face and at the sides.

PLANNING NOTES

These are product sizes, not the masonry opening. Ask us for the opening size before you build.
Your installer plans the wall, the hearth, the clearances and the flue route for your building.
Leave a 20 mm expansion gap between the sides and back of the body and the brickwork.
Keep the metal flue at least 200 mm from wood trusses.
Included: four hinged glass doors, a fire grate, a fire grid and an ash drawer.
Also included: a built-in damper, a natural convection system, insulation material and touch-up paint.
A guarantee certificate comes with it. The heating volume is 210 m³.
