05 WITH THE FLUE (SMALLER SCALE)

06 FLUE PARTS (SMALLER SCALE)

PLANNING NOTES

The 860 height runs from the floor to the foot of the flue. The flue and the cowl go above it.
The 3.6 m is the length of the supplied pipes, not the height your roof needs. Plan the flue route with an installer.
Included: the basket grate, the grid, the ash drawer, the damper, the insulation material and the touch-up paint.
The listed heating volume is 120 m³.
