PLANNING NOTES

These are product sizes. Ask us for the oven width before you build a counter or a base.
The 750 height is the oven only, without the chimney and the stand.
The 800 is the nominal length of the chimney pipe, not the height the chimney adds to the oven.
The oven weighs 150 kg.
It bakes three to four large pizzas at a time.
Move the coals to the side or the back and bake the pizzas directly on the oven floor.
The door, the standard stainless-steel chimney, a pizza lifter, a coal rake and a thermometer come with the oven.
The black chimney in the product photo is an option. The standard chimney is stainless steel.
The handles are removable.
The mobile stand and the slide-out preparation table are extras and are not drawn here. Ask us for their sizes.
On the stand: lock the wheels before you fit the chimney or use the table. Do not lean on the table.
Remove the chimney before you move the stand over uneven surfaces.
