PLANNING NOTES

These are the stove's own sizes, not a hearth or room size.
Ask us to confirm the height before you plan a tight fit.
Have an independent installer confirm the hearth, the flue route and the clearances from the installation manual.
The stove stands on its own legs, so it needs no built-in opening.
The Ø125 flue connects on top or at the rear. We confirm the flue parts for your setup.
It burns wood or anthracite and weighs 80 kg.
Flue pipes, accessories and installation are not included.
Send us a photo, your room measurements and roof details for a product and flue quote.
