02 SIDE VIEW

Back at the left. Front at the right.

03 TOP VIEW

Back at the top. Front at the bottom.

PLANNING NOTES

These are the stove's own sizes on its standard legs, not a hearth or room size.
The height and the rear flue height change with the legs.
Ask us which legs come with your stove before you plan the flue.
Plan the flue, hearth and clearances with an independent installer.
The flue connects on top or at the rear.
The lower connection at the rear is Ø100.
Outside air is included.
The stove is made entirely of cast iron.
The stove weighs 100 kg.
Flue pipes, accessories, installation and delivery are not included.
Send us a photo, your room measurements and roof details for a product and flue quote.
