Jetmaster Mynx 7-50 Freestanding Fireplace Bundle

05 FLUE KIT, INCLUDED (SMALLER SCALE)

PLANNING NOTES

These are product sizes. They do not include room clearances, a hearth or the installed flue height.
The 966 body height is before the flue connection, which projects above the body.
Included: the fireplace with a built-in damper, a log pan, an ash drawer and a poker.
Also included: three 175 mm × 1.2 m flue sections, a storm cowl, a ceiling plate and ceramic wool insulation.
The 3.6 m nominal total is not the installed height: the joints overlap and the route must suit your roof.
Add extra 175 flue sections if your roof route needs them, up to 5 per fireplace.
Have a qualified installer confirm the hearth, room ventilation, clearances and roof weatherproofing.
The hearth and the installation are not included.
