PLANNING NOTES

These are product sizes: measure the inside of your fireplace. The mantelpiece and the fireplace are not included.
If there is a chimney, it must be closed off. This is a flueless gas fireplace.
Keep combustibles 100 from the sides, curtains and fabric 500 from the sides, and furniture 1,000 from the front.
Keep the grate at least 500 from any air vent. A shelf above it must be heat-resistant masonry.
The room must hold at least 210 m³ if it has no permanent ventilation. Not for a bedroom, bathroom, toilet or sauna.
Gas: LPG at 2.8 kPa with a regulator of at least 2 kg/hr. Gas inlet tube: 8 mm.
A registered SAQCC Gas installer must fit it.
