# Homefires 1200 Super Deluxe Built-in Braai

### 05 FLUE KIT, INCLUDED (SMALLER SCALE)

### PLANNING NOTES

These are product sizes, not a building-opening size. Ask us for the opening size before you build.
Leave a 20 mm expansion gap at the sides and back, and fit insulation around the sides, back and top.
The chimney passage must be at least as large as the 500 × 350 flue outlet.
The lower door opens 300 in front of the braai: keep this space clear.
Included: two 1.2 m flue sections (2.4 m in total), a collar, a cowl base and a rotating cowl.
The minimum chimney height is 2.5 m. Your installer confirms the full height for your roof.
Extra flue sections (500 × 350 across, 1.2 m or 2.4 m long) and extra collars are sold separately.
