Homefires 1200 Super Deluxe Spit Built-in Braai

05 FLUE KIT, INCLUDED (SMALLER SCALE)

PLANNING NOTES

These are product sizes, not a building-opening size. Ask us for the opening size before you build.
The spit motor sits in the motor box at the left. Ask us for the motor box depth before you build.
Leave a 20 mm expansion gap at the sides and back, and fit insulation around the sides, back and top.
The chimney passage must be at least as large as the 500 × 350 flue outlet.
The lower door opens 300 in front of the braai: keep this space clear.
Included: two 1.2 m flue sections (2.4 m in total), a collar, a cowl base and a rotating cowl.
The minimum chimney height is 2.5 m. Your installer confirms the full height for your roof.
Extra flue sections (500 × 350 across, 1.2 m or 2.4 m long) and extra collars are sold separately.
Building materials, the electrical work and the installation are not included.
