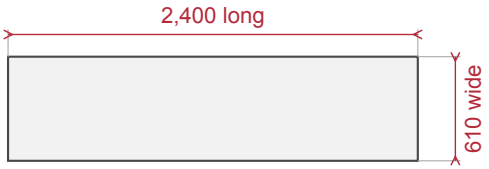
05 CERAMIC BLANKET (SMALLER SCALE)



Optional, sold separately.

06 BLANKET EDGE (LARGER SCALE)

PLANNING NOTES

These are product sizes, not a building-opening size. Ask us for the opening size before you build.
The body height does not include the gather above it or the flue.
Use a non-combustible surround and hearth, with masonry support above. Hide the gather behind the surround.
Have your installer confirm the insulation, the hearth protection and all clearances before building.
Use the Ø275 round flue. Have your installer confirm the full route, joints, support and roof exit.
Included: the firebox, smoke gather, damper, basket grate, pan and instruction manual.
Flue pipes, cowl, insulation and building materials are separate.
With the blanket, have your installer confirm the quantity, coverage and safe clearances.
This Premium model is an open-front radiant fireplace, not the Professional convection model.
Send your room, wall and roof measurements for a flue and configuration quote.
