06 FLUE SECTION FROM ABOVE

PLANNING NOTES

These are product sizes, not a building-opening size. Ask us for the opening size before you build.
Included: the braai with a grid, grid lifters and an ember maker, an ash pan, an ash drawer and a warming drawer.
Also included: a potjie hook, a single slide-in door and a light fitting.
Also included: a spade, a poker, insulation and touch-up paint.
The flue kit: two 1.2 m flue sections, a collar, a slip-on base and a rotating cowl.
Two 1.2 m sections give 2.4 m before joint overlap. The installed height depends on the route and the overlap.
Have the full chimney route, its support and joints, and the need for extra parts checked for your building.
