# Dovre Classic 640WD V2

Closed combustion wood stove: glass front door and a side door for loading

## 01 FRONT VIEW

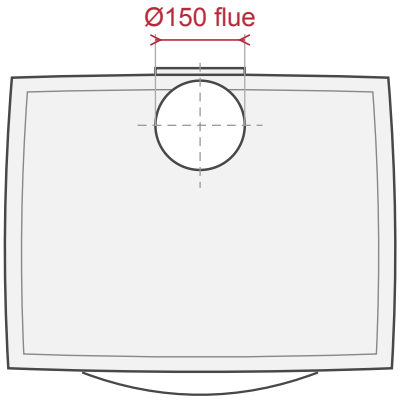

## 02 SIDE VIEW

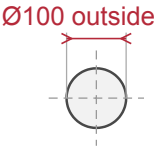

Back at the left. Front at the right.

## 03 TOP VIEW

Back at the top. Front at the bottom.

## 04 OUTSIDE AIR CONNECTION

It can bring the fire its air from outside.

## PLANNING NOTES

These are stove sizes. Ask us to confirm the width and depth before you plan a tight space.
Have an independent installer confirm the hearth, the flue and the clearances from the manual.
The Ø150 flue connects at the top or the rear.
The stove takes logs up to 45 cm long, and the side door makes loading them easy.
Ask your installer whether your room needs outside air, and plan the duct with the manual.
Chimney flue pipes and accessories are not included, and neither are the hearth plate or the installation.
