Dovre BRUT 200

05 TOP VIEW

Back at the top. Front at the bottom.

06 CLEARANCES, TOP VIEW (SMALLER SCALE)

Front at the bottom.

PLANNING NOTES

These are the stove's own sizes on its legs, not a hearth or room size.
The long-leg version is on our current list. Ask us before you order if you want the short legs.
The minimum clearance to a combustible ceiling is 750.
The floor radiation area is 350.
Keep 100 to non-combustible materials.
Connect the stove airtight to a correctly working flue. We recommend a competent, authorised installer.
It burns wood, in logs up to 35 cm long. The stove weighs 105 kg.
The door and an ash tray come with the stove. Flue pipes, accessories and installation are not included.
Send us a photo and your measurements for a product and flue quote.
