PLANNING NOTES

These are product sizes. Have your installer check the actual unit and safe clearances for your room.
It stands against a wall on its own plinth, so there is no chimney breast to build.
It is an open, vent-free gas fire, so there is no flue or chimney to build. Ask us and your gas installer for the room size and ventilation rules before you choose the room.
Included: the 760 gas box with glass sides and a 650 x 270 coal-finish gas grate.
The gas grate has piezo spark ignition and needs a registered gas installer.
At most 0.64 kg of gas an hour at full flame. Confirm your gas type with us before you order.
It weighs 65 kg.
The gas supply, the pipework and the installation are not included.
