Keep 100 to non-combustible materials.

06 REAR CONNECTIONS

PLANNING NOTES

These are the stove's own sizes, not a hearth or room size. Plan the whole space around them.
Have an independent installer confirm the hearth, the flue route and the clearances in the manual.
The Ø150 flue connects on top or at the rear.
A Ø100 outside-air connection is included. Ask your installer whether your room needs outside air.
The firebox takes logs up to 35 cm long.
The stove weighs 145 kg, so check that your floor can carry it.
Flue pipes, other accessories and installation are not included.
Send us a photo and your room measurements for a product and flue quote.
