Chad-O-Chef Fire Blade Fire Pit (Wood Burning)

Outdoor wood-burning fire pit: steel blades around a perforated fire plate, in two shapes

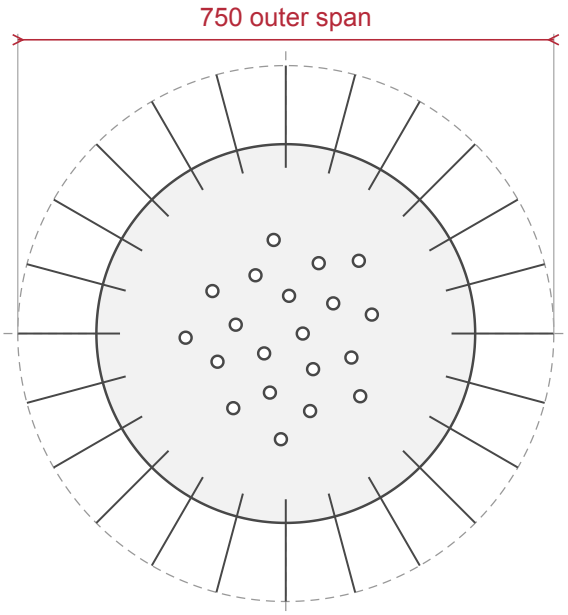

01 CURVE: FRONT VIEW

02 FLAME: FRONT VIEW

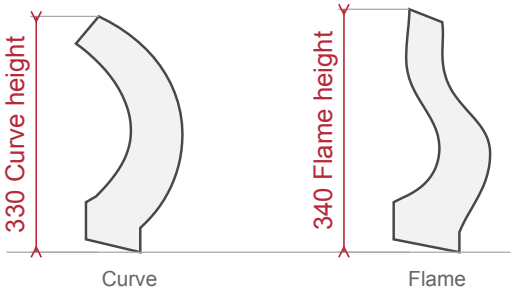

03 TOP VIEW (BOTH SHAPES)

Blades seen edge on. Holes in the fire plate.

04 THE TWO BLADE SHAPES

PLANNING NOTES

Two shapes with the same 750 span: the Curve is 330 high and the Flame is 340 high.
The steel is 2.5 to 3 thick, in rustic Corten, black mild steel or brushed stainless steel.
For outdoor use, away from children and flammable materials.
Fire heat can burn, crack or discolour the surface underneath, and rust can mark it. Stand it on gravel, soil or a dedicated area that can take the damage.
Mild-steel and stainless-steel FireBlade bases are sold separately. Ask us what comes with your shape and steel.
Ask us for the fire plate size, the weight and any size you need that is not shown here.
This is the wood-burning version. For gas, ask us about pairing a FireBlade with the Outdoor Firepit Burner 400.
