PLANNING NOTES

The two product sizes are for the blade housing. Ask us for the full depth and weight with the burner fitted.
For outdoor use only. A registered SAQCC Gas installer must fit it.
Set it on a masonry or steel platform, with a permanent free-air opening of at least 100 mm² under it.
Keep wood 800 away and fabric or furniture 1,500 away on every side, and ceilings or timbers 1,500 above.
Gas: LPG at 2.8 kPa, regulator of at least 4 kg/hr, 8 mm compression inlet. A natural-gas model is separate.
With logs, leave at least 50 between parallel logs. The housing steel is 2.5 to 3 thick.
