02 SIDE VIEW

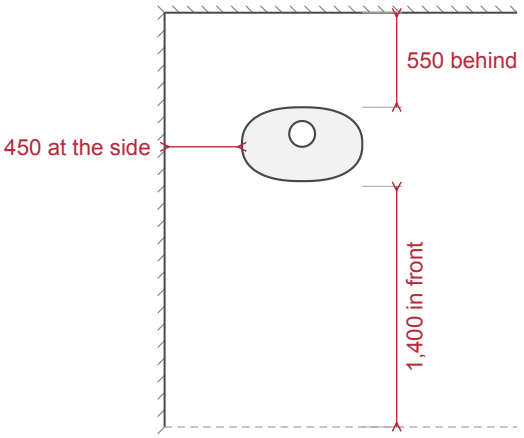

Back at the left. Front at the right.

03 TOP VIEW

Back at the top. Front at the bottom.

04 CLEARANCES, TOP VIEW (SMALLER SCALE)

Front at the bottom.

PLANNING NOTES

These are the stove's own sizes on its pedestal, not a hearth or room size.
The stove stands on its own pedestal, so it needs no built-in opening.
The flue connects on top. We confirm the flue parts for your setup.
Keep 750 to combustible materials above the stove.
Keep 310 to combustible materials below the stove.
The side radiation distance to combustible materials is 540.
Keep 100 to non-combustible materials.
Have an independent installer confirm the hearth, the flue route and the clearances from the manual.
It burns wood, in logs up to 50 cm long.
The door, the pedestal and an ash tray come with the stove.
Flue pipes, other accessories and installation are not included.
Send us a photo, your room measurements and roof details for a product and flue quote.
