Back at the top. Front at the bottom.

06 REAR VIEW, STANDARD LEGS

Handle side at the left.

PLANNING NOTES

These are the stove's own sizes, not a hearth or room size.
Ask us to confirm the overall width and depth before you plan a tight fit.
The flue connects on top or at the rear.
An outside-air connection lets the fire draw its air from outside. Ask your installer whether your room needs it.
The short legs are an optional accessory, sold separately.
Have an independent installer confirm the hearth, the flue route and the clearances from the manual.
It burns wood, in logs up to 35 cm long.
The stove weighs 100 kg.
There is no ash tray.
The door, the side windows and a detachable handle come with the stove.
Flue pipes, the optional short legs and installation are not included.
Send us a photo, your room measurements and roof details for a product and flue quote.
