04 REAR VIEW

Handle side at the left.

PLANNING NOTES

These are the stove's own sizes on its standard legs, not a hearth or room size.
Ask us to confirm the depth before you plan a tight fit.
The flue connects on top or at the rear.
Outside air is included. Your installer confirms the lower connection from the manual.
Have an independent installer confirm the hearth, the flue route and the clearances from the manual.
Flue pipes, accessories, installation and delivery are not included.
Send us a photo, your room measurements and roof details for a product and flue quote.
