02 PIPE180L, SIDE VIEW

03 END VIEW (LARGER SCALE)

PLANNING NOTES

These are nominal sizes. The lengths are the supplied lengths, before the pipes are joined, so the finished run can measure differently. Have your installer plan the number of pipes and the route.
Have your installer check the pipe against your braai or fireplace outlet and the cowl.
The 1.2 m pipe weighs 12 kg.
The 2.4 m pipe weighs 25 kg.
