Side view: the grate front at the right.

PLANNING NOTES

These are product sizes, not a building-opening size. Ask us for the opening size before you build.
It builds into one wall. Have your builder and gas installer plan the opening, the gas supply and the clearances.
It is open and vent free, so there is no flue or chimney to build. Ask us and your gas installer for the room size and ventilation rules before you choose the room.
The coal-finish gas grate comes with it, set up for LPG. At most 0.64 kg of gas an hour at full flame.
If your home runs on natural gas, ask us before you order.
The gas supply, the gas connection, building work and installation are not included.
