03 TOP VIEW

Front at the bottom. The other room at the top.

04 GAS GRATE, FRONT AND TOP

Top view: fingers at the front and the back.

PLANNING NOTES

These are product sizes, not a building-opening size. Ask us for the opening size before you build.
Build it into the wall between two rooms, or into a divider in the middle of the floor.
The fire is on show from both sides.
It is an open, vent-free gas firebox, so there is no chimney to build. Your gas installer confirms that your rooms and their ventilation suit it before it goes in.
The coal gas grate comes with it, set up for LPG. At most 0.79 kg of gas an hour.
If your home runs on natural gas, ask us before you order.
The gas supply, the gas connection, building work and installation are not included.
