Top view: fingers at the front and the back.

PLANNING NOTES

These are product sizes, not a building-opening size. Ask us for the opening size before you build.
Build it into the wall between two rooms, or use it as a room divider.
The fire is on show from both sides.
It is an open, vent-free gas firebox, so there is no chimney to build. Your gas installer confirms that your rooms and their ventilation suit it before it goes in.
Included: the gas box and the coal gas grate.
The body is mild steel with a stainless-steel façade.
The gas grate comes set up for LPG.
At most 0.79 kg of gas an hour.
The gas grate lights with a piezo spark.
The gas grate has an ODS safety system.
A registered gas installer must fit the gas grate.
The gas supply, the gas connection, building work and installation are not included.
