PLANNING NOTES

These are product sizes. Have your installer check the actual unit and safe clearances for your room.
It burns wood or anthracite. It does not burn gas.
It is an open fireplace.
It has solid sides and an open front.
A mild-steel convection fireplace that stands on its own against a wall.
It has a built-in damper.
It heats a room of about 140 m³. This is a room size, not a heat output.
Included: a fire grate, a grid, an ash drawer, an escutcheon plate, insulation, touch-up paint and a guarantee certificate.
Also included: a 3.6 m flue of three 1.2 m pipes with two collars, and a cowl.
Do not cook food in this fireplace.
The hearth, the ceiling and roof work and the installation are not included.
