02 SIDE VIEW

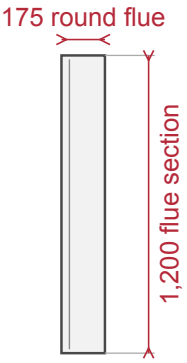

A glass door at the left and at the right.

03 TOP VIEW

A glass door at the top and at the bottom.

04 FLUE SECTION (SMALLER SCALE)

Each separate section.
Sold as an option.

PLANNING NOTES

These are body sizes, not clearances. They leave out the frame, the collar and the handles.
Have your installer check the actual unit, the base and the safe clearances.
This version comes without a log box, so plan the base it stands on with your installer.
It takes a 175 round flue (nominal size).
Have an independent installer plan the height, support, roof exit and any bends.
The flue pipe, cowl and escutcheon plate are options, and installation is not included.
Send a photo and measurements for a product and flue configuration quote.
