### 05 GAS INSERT FROM THE FRONT

### 06 GAS INSERT FROM THE SIDE

Front at the right.

### PLANNING NOTES

These are product sizes, not a building opening. Ask us for the opening size before you build.
700 is the model name, not a width.
Use the instructions of the unit for the opening, the insulation, the support and the clearances.
Have your installer check the unit, the gas connection and the safe clearances before you build.
The body is mild steel. The gas grill is stainless steel, with three burners and an igniter.
Included: the door with a built-in prep table, a drip tray, a regulator, copper tubing and a light fitting.
The flue pipes, the cowl, the adapters and the insulation blanket are sold separately.
