BRAAI CULTURE

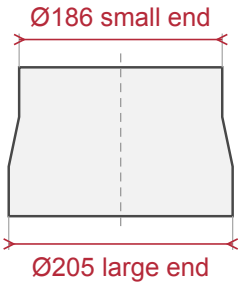

Dovre 2100 Built-in Fireplace

05 CONVECTION BOX, SIDE VIEW

Surround and front at the left. Back at the right.

06 FLUE ADAPTOR (LARGER SCALE)

Ask us which adaptor and flue pipes your setup needs.

PLANNING NOTES

The insert, the surround and the convection box have different sizes, and none of them is a masonry opening.
Have an independent installer choose the configuration and confirm the opening, the flue and the clearances.
Frame sets are optional and the configuration can differ.
Tell us which setup you want and we will confirm what comes with your order before you build the opening.
The flue connects on top. The door-opening direction can be changed: tell us which side you need when you order.
The firebox takes logs up to 500 long.
The insert weighs 130 kg on its own. Plan how it will be carried in and supported.
Flue pipes, accessories and installation are not included. Send us a photo and measurements for a flue quote.
