08 CHARCOAL SECTION, SIDE (LARGER SCALE)

Front at the right.

PLANNING NOTES

These are product sizes, not a building-opening size. Ask us for the opening size before you build.
The body is 1,540 × 645 × 1,055 mm, with 300 mm gather rise and a 1,590 × 1,085 mm frame.
Do not let the finished brickwork stick out past the front flange.
Leave a 20 mm gap between the body and the brickwork, at the sides and the back.
The lower door opens 510 mm in front of the body.
The left section has a three-burner deep gas insert with its own controls.
Have a registered gas installer fit the gas insert.
Solid fuel belongs in the charcoal section.
Included: the three-burner deep gas grill and the charcoal table section.
Also included: a height-adjustable grid, an ember maker and a potjie hook.
Also included: ash drawers, and top and bottom doors.
Plan and select the flue components separately for the actual route and the 600 × 485 mm outlet.
