ALL SIZES IN MILLIMETRES

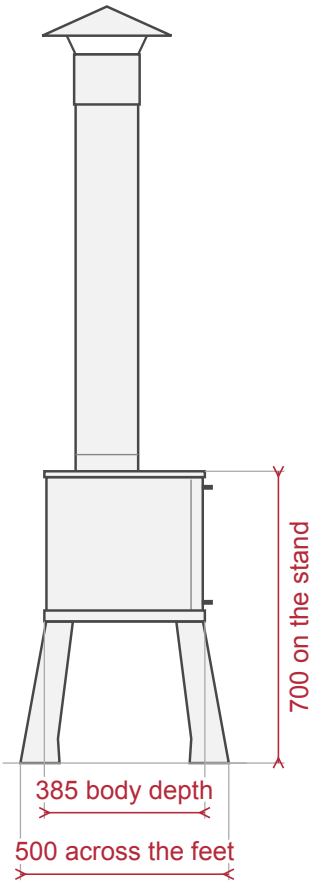

HomeFires Freestanding Farm Stove (complete)

03 TOP VIEW

Back at the top. Front at the bottom.

04 FLUE OUTLET (LARGER SCALE)

The back right corner of the top plate, from above.

PLANNING NOTES

The 700 height runs from the floor to the top plate, on the stand. The body alone is 360 high.
The flue and the cowl rise above the 700. Ask us for the height with them before you place the stove.
The 385 depth is the top plate, without the handles. The feet stand wider than the body: 920 by 500.
Ask us for the distance to keep from walls and from anything that can burn before you place it.
The oven can bake bread or roast a chicken, and the top surface can be used for cooking.
Fuel: wood or anthracite.
