Jetmaster 1200 Entertainer Hybrid

05 OPTIONAL FLUE SECTION (SMALLER SCALE)

One optional flue section is 1,200 mm long (nominal length).
Flue pipes, the cowl and an insulation blanket are sold separately.
Confirm the final flue route, support and clearances with an independent installer.

PLANNING NOTES

These are product dimensions, not a building opening. The 1,300 mm front-frame width is not a masonry opening size.
Add the 378 mm gather rise to the body height, and plan the 275 mm round flue separately.
Have your installer check the actual unit, door movement, insulation and safe clearances.
The firebox and gather are mild steel. The front frame, fascia and door are 304 stainless steel.
Included: a nickel-plated grid, a charcoal tray and a starter.
Also included: a potjie arm with a hook, and a light fitting.
