Chad-O-Chef Hob 3 Burner Drop-in Gas Braai

05 COUNTER OPENING

Keep the drip tray easy to reach from below.

06 VENT COVER

Fixing hole centres: 35 from the top.

Provide at least 300 cm² of free ventilation area.

PLANNING NOTES

These are product sizes. Cut the worktop opening to 725 × 430.
Use a non-combustible worktop.
Keep wooden sides and battens at least 100 from the body.
Line the worktop and the cabinet with fire-retardant material, such as ceramic blanket or vermiculite.
Allow the 220 drop below the top and the 450 cover rise above the worktop.
The 220 drop includes the body and the drip tray.
Use a registered gas installer. Indoor installations need an extractor hood.
Confirm the full cabinet arrangement with the Hob instructions before you build.
Keep the flat cover open while the grill is on or hot. A cooking dome is a separate accessory.
