PLANNING NOTES

These are product sizes, not a building-opening size. Ask us for the opening size before you build.
Leave a 20 mm expansion gap at the sides and back.
The minimum chimney height is 2,500 mm. The flue offset angle is at most 45 degrees.
The lower door opens 300 in front of the body and is a work surface when open: keep this space clear.
The body steel is 3 mm thick.
The spit motor, the motor box and the spit arm are included.
An electrician must install an electrical point for the spit motor and connect the light fitting to a switch.
The flue (350 x 500), the collar and the cowl are options and are sold separately.
