The body is 350 deep.

03 COOKING GRID

04 ASH PAN

Top: from above. Bottom: from the front.

PLANNING NOTES

These are product sizes, not a building-opening size. Ask us for the opening size before you build.
An ember maker is not included in this model.
Leave a 20 mm expansion gap at the sides and back.
The minimum chimney height is 2,500 mm. The flue offset angle is at most 45 degrees.
The chimney inner sizes must be at least the size of the flue outlet opening.
Finished brickwork must not protrude past the flange, so that the top door can stay open.
The lower door opens 430 in front of the body: keep this space clear.
The steel is 2.5 mm thick.
The flue, the collar and the cowl are options and are sold separately.
