PLANNING NOTES

These are product sizes: measure the inside of your fireplace. The mantelpiece and the fireplace are not included.
This is model VFG700. It is 650 wide.
If there is a chimney, it must be closed off. This is a flueless gas fireplace.
Keep combustibles 100 from the sides, curtains and fabric 500 from the sides, and furniture 1,000 from the front.
Keep the grate at least 500 from any air vent. A shelf above it must be heat-resistant masonry. No TV above it.
The room must hold at least 160 m³ if it has no permanent ventilation. Not for a bedroom, bathroom, toilet or sauna.
We recommend a room of at most 398 m³ and a floor area of at most 108 m².
Gas: LPG at 2.8 kPa. Maximum consumption 0.64 kg/hr, maximum input 8.7 kW. Gas inlet fitting: 8 mm.
It takes 14 coals or 12 pebbles, set with gaps of about 10 mm. A registered SAQCC Gas installer must fit it.
