Chad-O-Chef 600 Universal Grate

Flueless gas grate for an existing single-sided wood-burning fireplace

01 FRONT VIEW

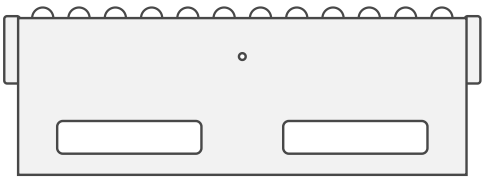

02 SIDE VIEW

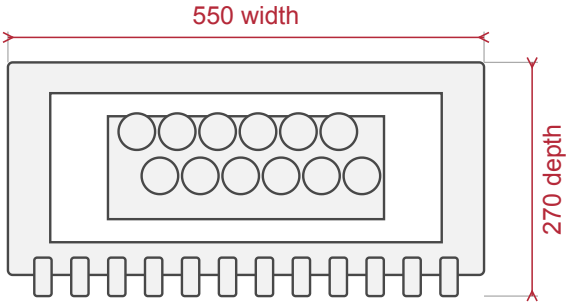

Front at the right.

03 BACK VIEW

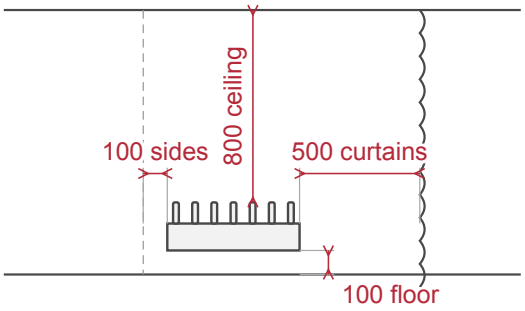

Two holes at the back for the gas pipe.

04 TOP VIEW

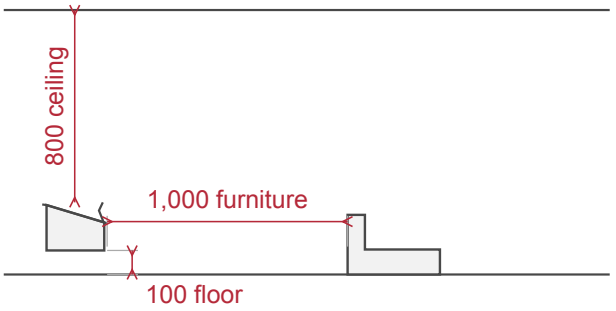

Front at the bottom. Coals or fire glass on the burner.

05 CLEARANCES, FRONT VIEW (SMALLER SCALE)

06 CLEARANCES, SIDE VIEW (SMALLER SCALE)

Front at the right.

PLANNING NOTES

These are the grate's own sizes, not a masonry opening. Have your gas installer check your fireplace before fitting.
The clearances are to combustible materials. The floor clearance includes carpet.
The grate, the burner, the decorative stones and the instruction manual are included. The surround is not.
The existing chimney needs closing off for this flueless conversion.
The gas connects at an 8 mm compression inlet. A registered gas installer for your gas type fits the grate.
Do not install it in bathrooms, bedrooms, toilets or saunas.
