Jetmaster Adhara Built-in Stove

Built-in slow-combustion stove for wood or charcoal: mild steel, with a front frame and a glass door

01 FRONT VIEW

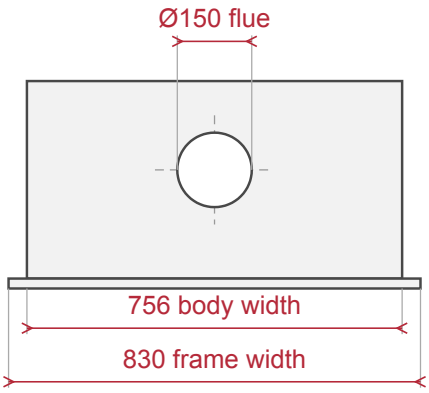

02 SIDE VIEW

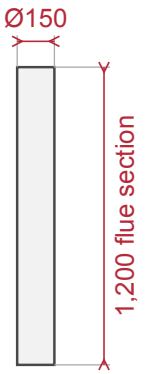

Front at the right.

03 TOP VIEW

Front at the bottom. Round flue outlet on top.

04 FLUE SECTION, AN OPTION (SMALLER SCALE)

The flue comes in separate sections.
The flue pipe is an option on this page, sold separately.
Send us a photo and measurements for a flue quote.

PLANNING NOTES

These are stove sizes, not a building opening. Ask us for the depth of the current unit before you build.
Have your installer confirm the cut-out and the safe clearances against the actual unit.
Plan the flue route and the roof exit with an independent installer before the building work starts.
It burns wood or charcoal.
Included: the stove and front frame with a lightly sandblasted door, vermiculite inner boards, a cast grid, a removable ash pan, a poker and the installation manual.
The cowl, building materials and installation are not included.
